

## General competition rules for cleaning-technology professional tournament

### I. Description of competitive conditions of Clean Europe:

- a. Competition consists of four races and the finals.
  - 1) Tennant contest, Cluj-Napoca, 31/03/2015
  - 2) Pulire, Verona, 21/05/2015
  - 3) Kärcher contest, Budapest, 10/06/2015
  - 4) Budapest (competition and finals at MATISZ' s annual conference) 20/10/2015
- b. Competition will have two events:
  - 1) **BASIC CLEANING ( using single disk machine and wet vacuum cleaner)**
  - 2) **IMPREGNATED MOPPING**
- c. **Two-membered teams** with an expert **can enter the competition.**
- d. To enter the finals, each team had to participate in at least one of the races and had to be qualified for the finals.
- e. Races are supervised by **the jury**. The results will be given according to execution.
- f. Jury of the competition are the experts of the teams and independent experts delegated by organizers. The experts can't assess their own team.
- g. Each team and their members will receive certificates.

## II. Description of competition tasks:

### 1) BASIC CLEANING (single disk machine and wet vacuum cleaner)

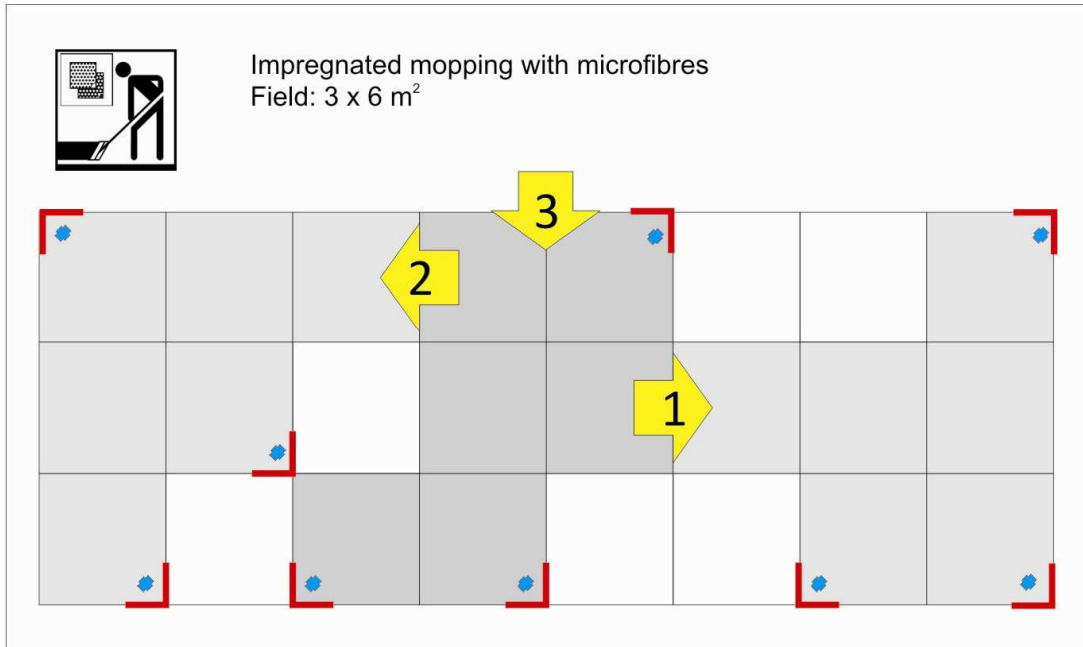

- Task of competition: single disk machine has to be led through the area, that it scrubs as large surface as possible. All water must be soaked up with the wet vacuum cleaner at the same time.
- The area is (2,5 m X 1,25 m) PVC coated and there are 12 cones on it.
- The two members have to work at the same time, one uses the single disk machine and the other uses the wet vacuum cleaner.
- Only specified tools provided by the organizers can be used.
- Single disk machine is equipped with hard brush and has 1,25 litre of water in its container. The pre-measured water has to be used, the water left in container will be measured by the jury.
- Single disc machine has to start from the START line through the end of the area, where the single cone has to be rounded three times. Then the machine has to be parked at the STOP sign, but outside of the area. The single disc machine has to touch every cone during the task. Meanwhile the other member soaks the water.
- The task is only finished when the member soaking the water waves, that he/she is ready.
- Each team has four minutes for the task. Teams don't get points for overtime activity.
- During the task the following occupational safety and health rules must be kept:
  - the cable cannot lead around the shoulder
  - keep the cleaning machines with both hands

- the cleaning machines cannot lead onto the wire, and may not driven to the other team-member's machine.

○

## 2) IMPREGNATED MOPPING

- Task of competition: pick of the garbage gathering (not with hand) and impregnated mopping of the given area using Reflex mopping system. Competitor should decide those two things to do it in one step or two. The impregnated mop appropriate use of pre impregnated microfiber tissue (moving 0,5 cm toward) after every 6 m<sup>2</sup> (at the start + 2times), while 12 piece of litter ( 4 piece paperclips, 4 piece creased post it, 4 piece staples) placed in the area have to be taken outside to START line. The 13<sup>th</sup> litter is an oil stain (0,5 dl), where must change the microfiber tissue on the Reflex mop. The red corners are not to overturn, and touching them is not to punish. The same type of garbage (for example paperclips) found on a 6m<sup>2</sup>- unit, 3 piece place into 1-1 corner one piece is to take on a signed field of the 6m<sup>2</sup>.
- Team members fulfil the task separately, cleaning the area according to the given order (A, B, C) and can't step on the cleaned area.
- For changing the order A, B, C, or missing the appropriate use of microfiber tissue after every 6 m<sup>2</sup> teams can be eliminated.
- From the two individual scores, only the better is considered.
- Only the appropriate impregnated mop system can be used.
- The area is 18 m<sup>2</sup> and it has 13 litters on it.
- Each member has 3 minutes for the task.
- The jury judge according to the following point of view: right S framed method, right microfiber tissue using, quality, ergonomics and the driest possible floor.

### III. Rules of judgement

The ultimate rank of the competition is given by sum of the points received for the execution time and penalty points.

- a. For execution impregnated mopping maximum 180 points can be received (3 min x 60 seconds); for basic cleaning maximum 240 points can be received (4 min x 60 seconds). This could be only achieved if the task would be accomplished in 0 second. The score is given according to the time, while the task was fulfilled. Time and punishment point in seconds is deducted from the 180 or 240 points. If it is more than the achieved, the team gets no points for the task.
- b. Conditions of punishment time for basic cleaning:
  - each NOT TOUCHED or overturned cones means 5 points of punishment, but the main cone, which has to be rounded three times, means 10 points of punishment by not touching or overturning.
  - breaking any of the listed OSH rules means 5 point of punishment.
  - if water left on the field, the team gets 25 point punishment.
  - remaining water in the single disc machine means 0-1 dl -> 0 point; 2-6 dl -> 10 point; 7-12,5 dl -> 20 point punishment.
- c. Conditions of punishment time for impregnated mopping:
  - each litter not taken to the START line or outside the area means 10 points of punishment.
  - leave the oil stain on the field means 10 points of punishment.
  - not appropriate use of pre impregnated microfiber tissue (don't move 0,5 cm toward) means 10 points of punishment by each 6 m<sup>2</sup> field.
  - non changing of the microfiber tissue means 10 points of punishment.
  - S framed method void executes, means 10 points of punishment by each 6 m<sup>2</sup> field.

All rights for modification of competition rules are reserved.
